

# Rainforest Reserves Australia

Make a Difference AND adopt a Tree Today

**PURCHASES ● RESTORES ● PROTECTS**

The mission of Rainforest Reserves Australia is to Purchase, Restore and Protect Rainforest Habitat forever. You can make a vast difference by supporting our on the ground Conservation efforts.

Our Local Rainforest EcoSystems are fragmented and endangered which need to be restored and protected in perpetuity. In North Queensland, clearing of land for agriculture production has impacted on our unique eco-systems, destroying populations of tree kangaroos, cassowaries, and many more precious native flora and fauna.

Rainforest Reserves know the importance of local farming, but more importantly how landowners, farmers and delicate eco-systems can benefit through revegetation projects.

Operating as a non-for-profit group, Rainforest Reserves Australia is hands on when it comes to connecting Wildlife Corridors to World Heritage listed Parks and Nature Refuges. Various community large scale revegetation projects on our properties are now established with over 100,000 rainforest trees since 2007.

As 100 acres has now been set aside for The Tableland Cassowary Rehabilitation Centre, we urgently need to plant out the steel slopes and springs of 52,000 trees to connect to the remnant and restored forests for the Barrine Park Nature Refuge expansion.

You can make a vast difference to wildlife by supporting our efforts to expand their Habitat. 100% of your donation will go towards Reveging the Atherton Tablelands Project. 52,000 Trees on 100 Acres.
